

Reaching Your Pour Without Reaching In Your Pocket...

Front Discharge Conveyor uses innovative technology to make short work of long reaches.

Hensel Ready Mix introduces the first and only Front Discharge Conveyor Ready Mix Truck in the United States. The front discharge conveyor offers a very flexible delivery package that is both convenient and economical. Imagine being able to easily reach and pour footings and walls up to 36' away from the truck in most residential, commercial and industrial sites.

Lower Cost

Can eliminate the cost of using a pump & time spent coordinating concrete delivery and pump arrival.

Eliminate

Can be positioned to create access to difficult areas to deal with obstacles such as rough ground, fences, walls and even windows and doors.

Versatility

Other mixers on the job can also discharge concrete onto conveyor truck.

Flexibility

With the telescopic feature, in action you are able to pour in different directions and fill extended lengths of formwork and footings without moving the truck.

Remote Control

Conveyor can be controlled from cab by mixer operator & can be remotely controlled from the placement area.
